

Bay-2 GeoRisk for your electronics

Identify, Assess and Manage Risks

Risk Prevention for Electronic Devices

Bay-2 GeoRisk helps you identify, assess, and manage risks posed by natural disasters, political instability, and crises. Evaluate your multi-level BOMs for geopolitical, environmental, and infrastructure risks that could impact your supply chain, thanks to automated data imports.

- FLOODS
- EARTHQUAKES
- WILDFIRES
- GLOBAL PANDEMICS
- MILITARY DISPUTES
- STORMS

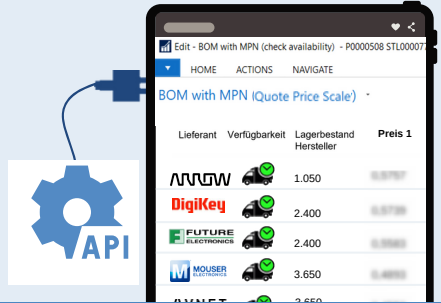

- ✔ Efficient Risk Assessment
- ✔ Automated Data Processing
- ✔ Enhanced Risk Management Processes
- ✔ Increased Supply Chain Resilience

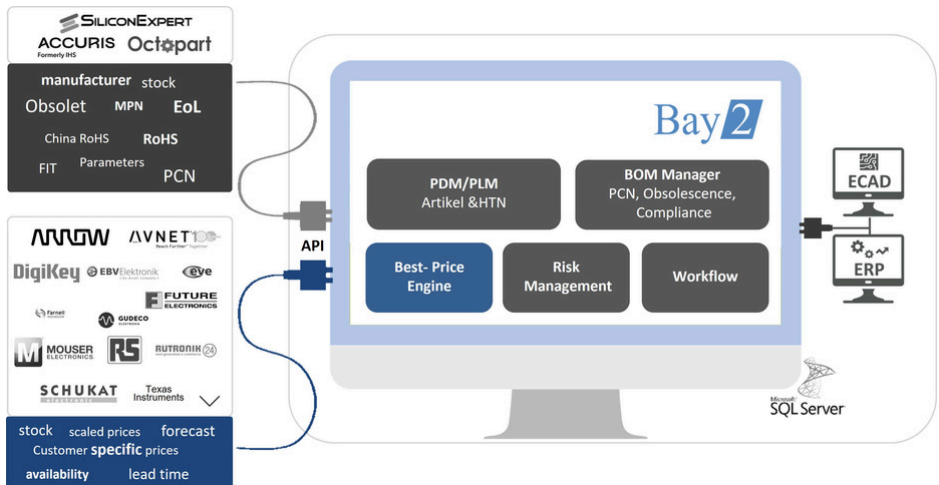

Bay-2 Best-Price Engine

The integrated Best-Price Engine accesses distributor data via API. Prices and availability are researched and imported in real time.

- **Rapid Pricing:** Prices from distributors and manufacturers are available within seconds
- **Availability check:** Stocks and delivery times of the components are taken into account
- **Integration:** Interface to ERP price database
- **Monitoring:** Graphical representation of price and inventory development
